

SATENDRA

Senior Angular Developer | Full Stack Engineer (Angular + Java Spring Boot)

satendracaria@gmail.com | +91 9953096599 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Angular specialist and full stack engineer with 4+ years building scalable, production-grade web applications, with deep expertise in **Angular (v14–21), TypeScript, RxJS, and Signals**, complemented by Java/Spring Boot backend integration. Proven track record leading Angular version migrations, performance optimization, and reusable component architecture in high-stakes banking and fintech environments.

Delivered **Loan Origination Systems, AEPS, Micro-ATM, Recharge, Bill Payments, Cash-Out, and financial dashboards** for major banking clients, integrating REST APIs, JWT authentication, Role-Based Access Control (RBAC), Aadhaar-based device SDKs, and MySQL. Skilled at modernizing legacy Angular codebases, cutting UI latency, and reducing production defects through disciplined debugging and code review.

Comfortable owning frontend architecture end-to-end in Agile/Scrum teams, from reactive-forms design through lazy loading, module splitting, and interceptor-based security — with backend fluency to unblock full-stack delivery.

TECHNICAL SKILLS

Angular (Primary): Angular 14–21, RxJS, Signals, Reactive Forms, Angular Material, Lazy Loading, Module Splitting, Interceptors, Zone-less Change Detection, Angular 19→21 Migration

Frontend: TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, Tailwind, PWA, TWA, Cross-browser Compatibility

Backend: Java, Spring Boot, REST APIs, JWT Authentication, Spring Security, Microservices

Databases: MySQL

Architecture & Security: Role-Based Access Control (RBAC), Reusable Component Design, Aadhaar Authentication, Debugging & Performance Optimization

Device Integration: Mantra, Morpho, Micro-ATM SDKs

Tools: Git, GitHub, GitHub Actions, Postman, IntelliJ IDEA, Jira, Docker

PROFESSIONAL EXPERIENCE

Software Engineer (Angular + Java) — Vastika Technologies

Dec 2025 – Sept 2026 | Contract

- Led Angular-based multi-step loan journey development for ADCB Loan Origination System, improving loan onboarding workflow efficiency by 30%.
- Delivered user stories, resolved production bugs, and shipped UI enhancements against business requirements in sprint cycles.
- Partnered with QA, backend, and business teams to ensure on-time sprint delivery and rapid issue resolution.
- Engineered dynamic, backend-flag-driven UI rendering for ROI, processing fees, security, stock statements, and credit limits.
- Built document upload, customer data capture, eligibility verification, and application tracking modules end-to-end in Angular.
- Enhanced dealer-focused loan workflows and dashboards for Axis Bank Loan Origination System (LOS).
- **Led the Angular 19 → 21 migration** — upgrading dependencies, resolving breaking changes, and refactoring deprecated APIs for a zero-downtime transition.

Software Engineer (Angular + Java) — Redmil Business Mall

Sep 2024 – Nov 2025

- Maintained and extended Angular-based fintech applications integrated with a Java Spring Boot backend.
- Built fintech modules — AEPS, Micro-ATM, Recharge, Bill Payment, and Cash-Out — with full end-to-end REST API integration.
- Implemented JWT-based Role-Based Access Control (RBAC) across Admin, Agent, and Retailer user roles.
- **Integrated Mantra, Morpho, and Micro-ATM device SDKs** for Aadhaar-based authentication, cutting transaction errors by 40%.
- Collaborated with backend teams to optimize REST APIs, strengthen error handling, and harden API security.
- Built Spring Boot REST APIs for data extraction and export, improving processing efficiency and scalability.

Angular Developer — Redmil Business Mall

Apr 2022 – Aug 2024

- Enhanced Angular-based financial applications with new features, improving scalability and performance.
- Resolved UI/UX issues and API synchronization challenges in HDFC Loan CRM, cutting lead processing time and improving user experience.
- Designed reusable Angular components for real-time financial dashboards, cutting development effort for new modules by 40%.
- **Reduced UI latency by 35%** through zone-less patterns and manual change detection techniques.

KEY PROJECTS

Vastika Technologies — Axis Bank LOS (Dealer Journey) (Angular)

- Expanded dealer-focused loan origination flows, dashboards, and application-tracking modules in Angular with backend integration.
- Tech: Angular, Angular Material, Jira, Spring Boot, MySQL.

Vastika Technologies — ADCB Loan Origination System (Angular)

- Built configurable multi-step loan journeys in Angular, integrated with Java Spring Boot APIs, for end-to-end loan onboarding.
- Tech: Angular, Angular Material, Jira, Git, GitHub, Scrum.

Redmil Fin-tech Platform — Banking & Payments (Angular)

- Built a full-featured fintech web application spanning AEPS, Recharge, Bill Payments, Wallet Transactions, and Micro-ATM services, with secure login, authorization, transaction dashboards, and independent API integration across modules.
- Tech: Angular, Angular Material, REST APIs, JWT, RxJS, Spring Boot, MySQL.

Redmil Website — PPF (Paint Protection Film) (Angular)

- Built a dynamic Angular website for paint protection film services, including car listings, product management, blogs, and an admin dashboard.
- Tech: Angular, Angular Material, REST APIs, JWT, RxJS, GitHub, Postman.

OPEN-SOURCE CONTRIBUTIONS (ANGULAR)

- **SC-Angular-Generator (VS Code Extension)** — automates Angular boilerplate generation.
- **@kudoengineer/http** — Production-ready Angular HTTP client with authentication, retry, timeout, cancellation, caching, request deduplication, request IDs, logging and Signals.
- **@kudoengineer/toast** — Modern Angular toast notification library with standalone architecture, Signals and tree-shakable design.
- **@kudoengineer/loader** — Customizable Angular loader library with 20 loader types, manual controls, overlay support and HTTP interceptor integration.
- **@kudoengineer/permission** — Angular permission and role-based access control library for implementing authorization at the UI/application layer.
- **@kudoengineer/theme** — Angular theme management library supporting Light, Dark and System themes.

EDUCATION

Bachelor of Computer Applications (BCA)

Avviare Educational Hub, Noida (2019 – 2021)

CERTIFICATIONS

- Master Java (Spring Boot, Spring Security, Docker, Microservices) — 2025
- Web Designing with MySQL
